TRADE NEWS

DESIGNED for transporting in light planes, cars or small yachts, the *Airscooter* is a fully sprung short range two seater lightweight with a 49 c.c. *Zundapp* 2-speed engine. Its special interest lies in the fact that it can be taken down to four units in a matter of seconds and stored in the space of the boot of an ordinary car or the tail of a light plane. Of light alloy construction the weight of the complete machine is quoted as only 65 lbs. and the price, including P.T. is £105. 5s. 0d. Makers are : AIRSCOOTERS, LTD., 93 Regent Street, W.1. REGent 3146.

A NEW 4-horsepower...
