Winged Wheel Bicycle

SPECIFICATION

This new B.S.A. Bicycle has been designed to provide a really strong and comfortable frame for use with Motorised Wheels of all types. It has a 22/20" frame of heavy gauge tubing to withstand the higher speeds and stresses imposed by Power cycling and a cranked top tube to give a lower riding position. These coupled with the Webb Spring Fork and large mattress type saddle give maximum comfort and control and reduce vibration to a minimum. An Amal twist-grip throttle is fitted. The wheels are 26" \times 1½" with Westwood rims and Dunlop tyres.

A special front brake for the Westwood type wheel rim is normally fitted but Hub or Caliper brakes can be used if preferred.

It is attractively finished in black or gunmetal with the usual B.S.A. super chromium plated bright parts.

B.S.A. Model 615 W.W. (Lady's Model 635 W.W.)

Bicycle complete with Winged Wheel unit, number plates and licence holders.

£48.18.2 incl. tax

B.S.A. Model 615 (Lady's Model 635)

Bicycle complete with number plates and licence holder but less rear wheel and Winged Wheel unit.

£17.14s. incl. tax

B.S.A. Model 614 (Lady's Model 634)

Frame only, complete with Webb front fork, steering head and bottom bracket fittings.

£7.10s.

A special lighting set, the Miller 6.T.M., has been designed expressly for use on all bicycles fitted with the B.S.A. Winged Wheel, and is available at an extra charge.

The complete Winged Wheel Bicycle and the Bicycle less the rear wheel and motor unit are also available under the Sunbeam and New Hudson names at the prices shown above.

Sunbeam (complete machine) Model T14 W.W. (Lady's Model LT14 W.W.). Less Winged Wheel unit Models T14 and LT14.

New Hudson (complete machine) Model G13 W.W. (Lady's Model L23 W.W.). Less Winged Wheel unit Models G13 and L23.
