

# BRAMPTON

The very heart of the cycle—the hub. Smooth-running, long wearing and providing effortless movement. Perfection in every detail, produced by Brampton:

**hubs**

they always *"Wear"* better

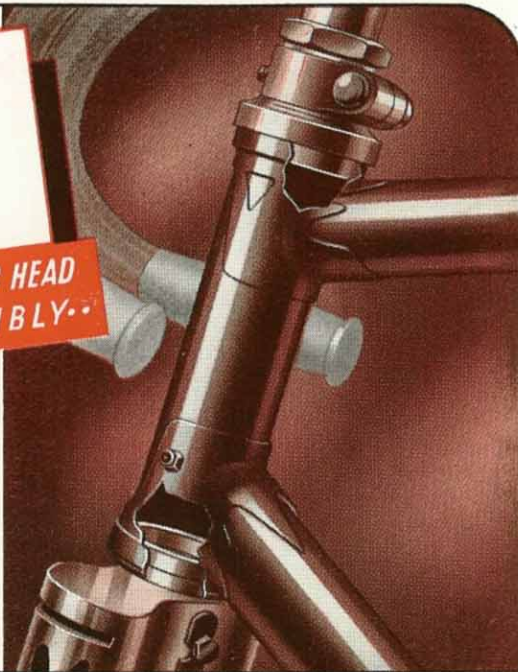

BRAMPTON FITTINGS LTD., OLDBURY, BIRMINGHAM.

**WHEREVER  
 THE STRAIN  
 IS GREAT**

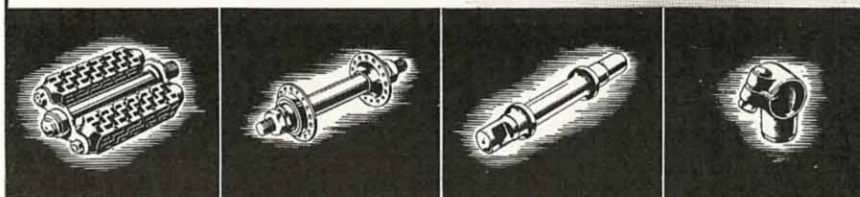

**STEERING HEAD  
 ASSEMBLY..**

It is the hidden components of a bicycle which take the strain in action. For instance, the working parts of the steering head assembly cannot be seen, but if they are BRAMPTON Fittings, they will be accurately machined and case hardened to withstand the jars of uneven roads and to ensure a life as long as that of the cycle itself.
