

Introducing the
EXPRESS MARK III

83 GNS
plus
INCL. P.TAX

The Mo-ped you'll be really proud to own!

Because it has the performance, the looks and the reliability, the "Express" Mark III is, above all, the Mo-ped you'll be proud to own. Just look at some of these leading features in its specification:-

- Dual front springing system (oscillating arm and telescopic springs) with pressed steel fork.
- Telescopic rear springing.
- Double oval tube frame fully adapted to front fork and rear springing.
- Deeply valanced mudguards.
- Powerful full-width drum brakes.
- Lively 1.2 b.h.p. engine. Two-speed gear with control to permit machine being pedalled like an ordinary bicycle.
- Six volt lighting and full equipment.
- Tried and tested for long periods over some of Europe's worst roads and, therefore, a really reliable touring machine.

Ask for free copy of leaflet fully describing the Express Mark III at your dealer's or write to:—
