JAWA is known even to forest paths

Just like the other models of JAWA motorcycles, so the smallest and most economical of them—the 555 model—is outstanding due to its easy handling and perfect stability. Therefore you will meet it not only on highways, but even where the path is hardly wider than the track of its wheels and where it would be difficult to ride a heavy machine.

The JAWA 555 model is a very light machine of attractive styling, with a low fuel consumption of 175 m.p.g. (1.6 litres per 100 km) and with a more than adequate top speed of 40 m.p.h. (65 km p.h.). Closer acquaintance will convince you once more that

each of the world-famous

models spells quality
