YOU STILL NEED FAST TYRES!

Most clubs are carrying on; time trials, sports events and fast club runs are again the order of the day.

JOHN BULL "SAFETY SPEED"

From the point of view of speed, the effect of the John Bull "SAFETY SPEED" is that of the plain tread track tyre. When brakes are applied the patent ratchet tread gives a non-skid road hold never before obtained in a cycle tyre.

Riding John Bull "Safety Speed" Tyres, Harry Hill broke the 50-mile record to establish the fastest record ever made on standard wired-on tyres.

Every club rider will realize that the John Bull "Safety Speed" provides the answer to his greatest need—an exceedingly lively sports tyre which has proved its speed beyond all question.
