*Lively*

**Leopards**

*The Lively* **Leopard**  
**BOBBY 3**

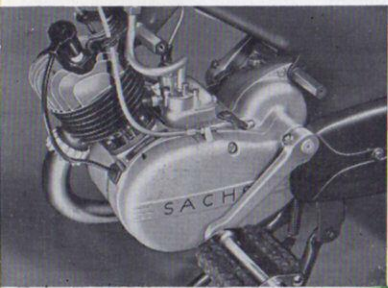

The front suspension is by a sprung swinging-link which, together with a rubber cushion saddle in a shock absorbing cradle, ensures comfortable riding under all conditions.

The full-width brakes and re-inforced axle add to the safety of this machine.

Every LEOPARD dealer is able to give immediate after-sales service and spare parts for the SACHS engine are always available.

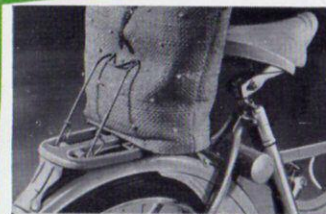

**with the famous**  
**SACHS engine**

The famous 50 cc Sachs engine is light and compact and is built "in unit" with a two speed gearbox and sturdy clutch. With pedal kickstarter, output 1.6 H.P. "Bosch" flywheel magneto-dynamo 6 V/17 W.A.C. The coaster brake is operated by the pedals.

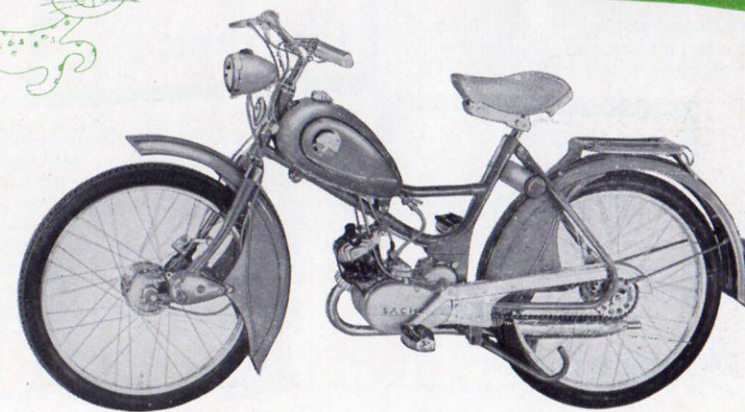

The specially designed saddle, broad and well-sprung, takes the jolts out of the toughest going.

The super-suspension Springing is an extremely important feature to which the Designers have paid special attention thus ensuring smooth riding.

The special carrier with spring clips for holding light luggage or parcels securely.

The lively Leopards are fitted with 'reflector-studs' on the pedals for maximum safety at night.

Everyone is talking about the *Lively* **Leopards**
