

BIG ***LIGHT*** **IN WEIGHT**
IN POWER OUTPUT

- Dynamo has strong, light alloy body casting. Bright and attractive silver lustre finish.
- Self-lubricating one-piece bearings. ● High-efficiency special magnet. ● Full output at low speeds with output regulation at high speeds, reducing risk of burnt-out bulbs. ● Universal Fixing Bracket, strong and adjustable, suitable for either side of any type of front or rear fork. ● Headlamp; stand-by battery operates pilot bulb and rear light.

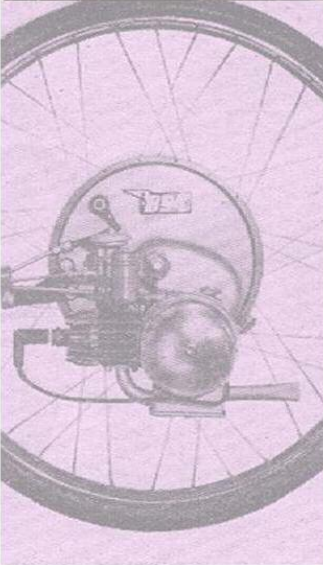

Economical and dependable in service, the latest range of Lucas Dynamo Sets are all powered by the entirely new CD 33 dynamo, which weighs only 12½ ozs (0.347 kg) complete with bracket. Maximum output at 8-9 m.p.h. (13/14 k.p.h.), producing 3.3 watts at 6 volts, with ample light at walking pace.

There is an excellent choice of Headlamps, all with the new fluted reflector which gives a wide, powerful, long-range beam.
