

*Showing the internals—a 48 c.c. Mosquito cycle attachment with plastic flywheel, covers, and other components*

## The Milan Show

Continued Emphasis on Lightweights and Cycle Attachments :

and hydraulic damping. Ignition flywheel magneto and the carburetor has a float chamber remote-mounted in the saddle tube of the frame.

A second newcomer from the Lambretta is known as the "Mosquito" three-wheeler with a 48 c.c. engine for two persons. The 125 c.c. engine is a three-speed gear with a sliding change mechanism. The front wheel is 16 inches in diameter, and half-elliptic springs are employed. The rear wheel is fitted with a 16-inch tire.

A welcome addition to the line made by the Italian firm is the war Benelli "Mosquito" scooter, owing to its light weight and damaged line. For the modern sportsman, the latest Benelli scooter has a new frame design which changes the geometry of the scooter.
