MOTOR^{THE}**CYCLE**

running the training scheme there will be ample facilities for handling, etc., during the early lessons, and such use will soon add confidence to that keenness.

I hesitate to claim any records for Mr. Mayer, but he tells me he has already got his machine—a 125 c.c. Royal Enfield of the same type as that with which we have been issued under the R.A.C.-A.C.U. scheme (manufacturers, please note), and intends to dissipate his precious petrol on a Gaitskellian orgy of getting to work more easily. I only hope they have given him a good ration.

JAMES SHELDON.

Isleworth.

Sunbeam M.C.C.

38 c.c. MOSQUITO

Opinion from Australia

"HANGING HARP" condemns the 38 c.c. Mosquito. I and many of my friends are going to try to obtain one, as we think it is a grand little piece of machinery. Perhaps "Hanging Harp" has a "Mosquito"? If not, how on earth can he condemn it? The crack about mud, etc., is nonsense.

Perth, Western Australia.

B. HARPER.
