## NSU SPORTS QUICKLY IS COMING

**L**AATEST addition to the range of NSU machines available in Britain and Commonwealth countries is the Quickly Cavallino—a sports version of the world-famous Quickly moped.

It will be available to the trade shortly. The decision to give large-scale distribution to the Cavallino is part of a major scheme of expansion planned by NSU (Great Britain) Ltd. to precede the motor and motor-cycle shows—a scheme which will embrace the Prinz four-seater car and other products.

The Quickly Cavallino has all the features of reliability, performance and economy associated with the world's most popular moped. In addition, it has sports-type handlebars and fuel tank, 23 in. wheels fitted with heavy tyres,

longlift telescopic front-forks and long-arm rear suspension.

Other features include:

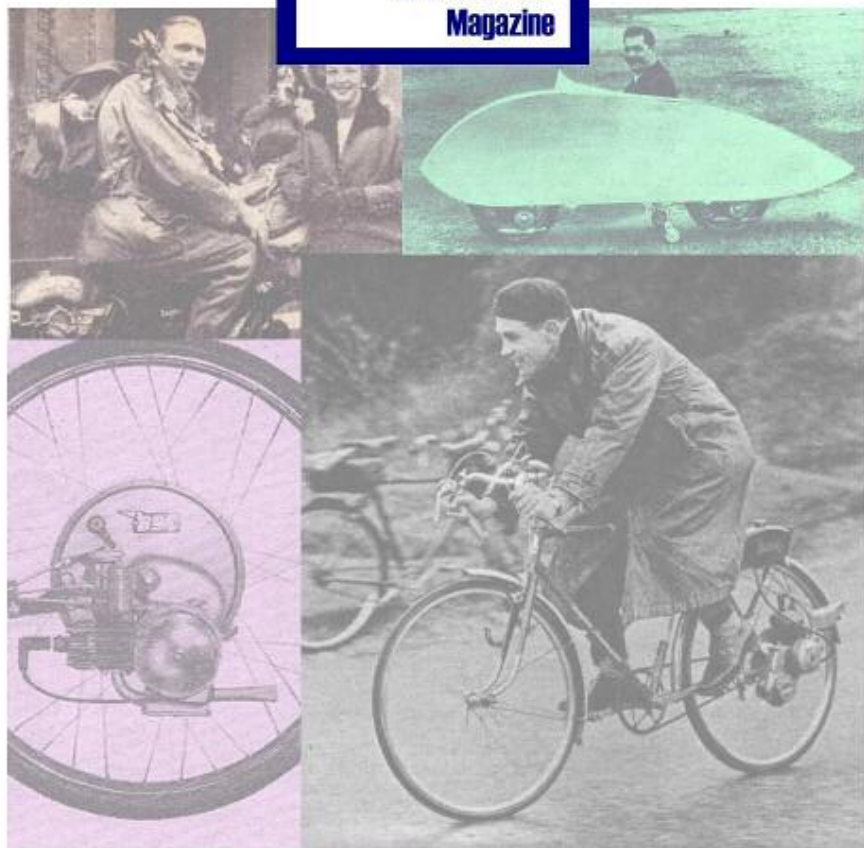

The 49 c.c. Quickly power-unit, three-speed gear, a large diffusion silencer, full-width brake hubs, and compression ratio of 5.5 to 1.

The Cavallino has a light but sturdy Italian-style frame, which is sporting in appearance and torque-free. Finish is red lacquer with contrasting two-colour tank and chrome rims.

**RIGHT IN FRONT** of W. L. Handley's window in Suffolk Street, Birmingham, is the Ariel Leader.
