DECEMBER 1976

SERVICE SHEET NO. NVT - 8

SUBJECT: EASY RIDER MODEL ER2, STARTER CABLE ATTACHMENT

The latest version of the two speed engine, from engine number 2/1405 onwards, has a simplified method of connecting the lower end of the starting cable to the starting thrust ring assembly, located inside the right engine cover.

It is now possible to change the starting cable without removing the right engine cover which is the case with the original design.

The change introduces the following new parts, please make a note of the information in your copy of the Model ER2 Parts List publication number 09-0557.

<u>PART NO.</u>	<u>DESCRIPTION</u>	<u>RETAIL PRICE</u>	<u>QUANTITY</u>
09-0720	ENGINE SIDE COVER, RIGHT HAND	£7.52	1
09-0717	STARTING CABLE THREADED FERRULE	0.62	1
09-0718	ALUMINIUM WASHER	0.08	1
09-0719	WIRE CONNECTOR HOOK	0.37	1

Whilst the new parts can be fitted to earlier engines as a set, we intend to stock and supply parts of the original design to service engines prior to ENGINE NUMBER 2/1405.

The starting cable and starting thrust ring are unchanged.
