Palmer Tyre, Ltd.

THERE have been no additions to the popular range of Palmer cycle covers and tubes during the past season, but minor improvements in design and construction have been made—notably in the new and well-balanced Roadster cover.

This all-purpose, all-weather tyre has now been running for several months and news of its hard-wearing properties is spreading rapidly and widely.

An interesting point is that riders find the new tread to be as fast as many sports designs, yet stability on cambers and corners is remarkably good.

The Palmer Pixie, with its black rubber tread and translucent sidewalls, makes more and more friends among club riders as time goes on. They like its clean, smart appearance and soon learn that its beauty is more than tread deep. The translucent Palmer Sports is another club favourite.

Buyers can choose red or black rubber for their Palmer tubes, which are now packed in new and attractive cartons of convenient size and shape. The lively, resilient quality and the toughness of these Palmer tubes are well known.

The delivery position in respect of Palmer rims and wheels has improved quite substantially during the past year.

London, S.W.1.
