New Mo-peds from France

LAATEST mo-peds on the British market are the two *Paloma* models imported from France by Europa Imports, Ltd., of Reading.

The machines both use the same *Lavalette* engine which is fitted with the "multimatic" clutch, a fully automatic form of transmission which reduces the riding controls to one—the throttle.

The 49 c.c. power unit gives an output of 1.9 b.h.p. and produces a lively performance with good climbing. Starting can be either by kicking down a pedal with the machine on its stand or by pedalling away as on a normal bicycle. At about 3 m.p.h. the first stage of the "multimatic" clutch takes up and

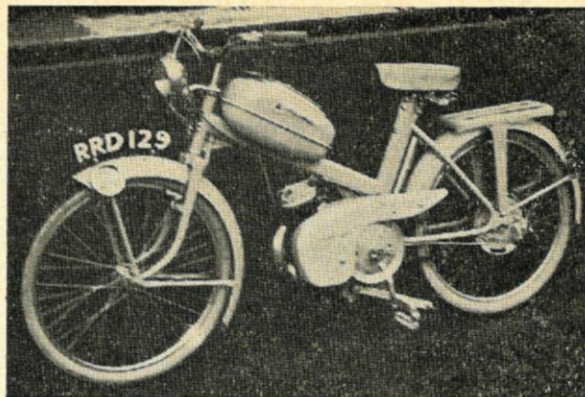

*This is the
T.T.A. model at
£54. 19s. 11d.*

starts the engine, as the revs mount so the second stage comes in and takes over the drive up to about 8 m.p.h. when the final, solid drive stage cuts in with a light "clonk" almost as though one has changed up.

We have made brief tests on both machines and found them easy to handle, comfortable (full adjust-

ment is provided for both saddles and bars) and very lively in performance. The *D.A.S.L.* model is very elegant and has telescopic forks and two hub brakes. The *T.T.A.* is a workmanlike job with rigid forks, caliper brake and forward mounted tank.

The machines offer very good value for their modest prices.

*"If you can ride a bicycle
you can ride a Paloma"*

Two NEW mopeds from FRANCE with the famous LAVALETTE engine and with the MULTIMATIC clutch on both models.

T.T.A. £54. 19. 11

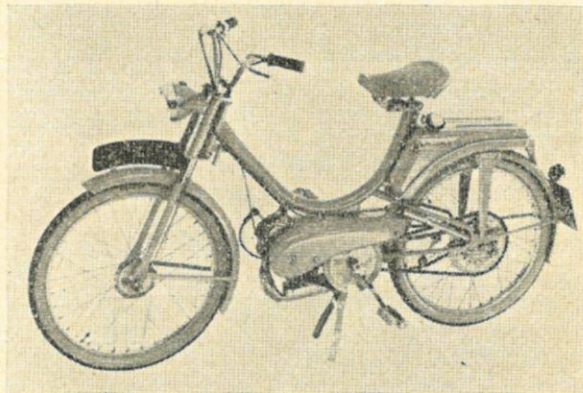

Ideal economy moped driven with the simplicity of a cycle. 2 controls only—twist grip throttle control, handlebar lever brakes.

Multi-matic clutch which engages automatically when required. No more queueing, saves time and money. Available in Mercedes blue or beige.

D.A.S.L. £56. 19. 6

This model is powered by identical Lavalette engine and multimatic clutch as the T.T.A. machine. Fitted with telescopic forks, Hub brakes, Alloy hubs. Petrol tank capacity 1½ gallons. Available in black, Mercedes blue or beige finish.
