

CYKELAID. (158.)

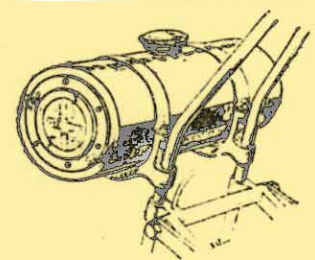

For Motorising Bicycles.

1½ H.P. MODEL.—55×56 mm. (133 c.c.); single cyl. two-stroke; petrol lubrication; Amac carb.; flywheel mag.; clutch, no kick-starter; chain drive; 26×2½ in. tyres. Price £24 10s.

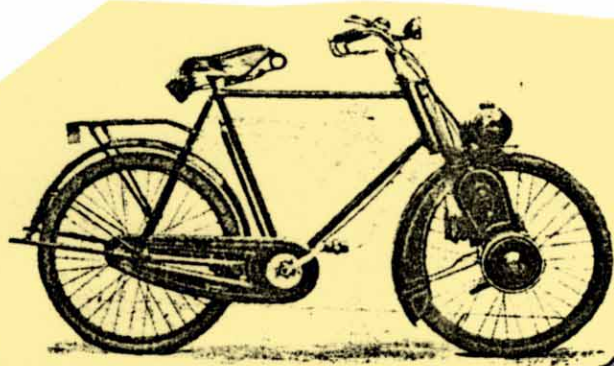

SHEPPEE MOTOR CO., LTD., Thomas Street, York—In its latest form the Cykelaid motor-assisted bicycle is far more workmanlike in design than such machines have been in the past.

The little power unit fits very neatly to a special front wheel with the petrol tank above the mudguard, motor cycle type spring forks, and the silencer actually bolted to the mouth of the exhaust ports. Control is limited to a single-lever carburetter, and the whole of the mechanism is as simple as possible. Two ladies' and

two gentlemen's machines are shown, one of each type being provided with a substantial motor cycle type carrier, and all with the motor cycle type stand.

The licence holder on the Cykelaid is accommodated in the end of the tank.

Cykelaid motor attachment for pedal cycles.
