THE TELELINK (REG'D) CONVERSION SPRING FORK IS RIGHT IN FRONT

Now Only
75/-
 or by post
77/-

This outstandingly brilliant achievement in spring fork design is rapidly becoming accepted as the ideal form of front fork suspension for cyclemotors. The only British Made fork having the exclusive Andre Neidhart rubber damping, giving a delightfully smooth progressive action.*

SMOOTH OUT THOSE BUMPS!

These are the features that put the TELELINK right out in front of all others.

- ★ No structural alterations to fit. Simply bolted on!
- ★ Smooth silent PROGRESSIVE ACTION that gives you a supple ride with no "bottoming".
- ★ Soundly engineered from the finest materials.
- ★ Auxiliary tension springs to take static weight (*adjustable*)
- ★ Suitable for all braking systems.
- ★ Negligible weight addition to your machine.
- ★ Beautifully finished in black, napier green or maroon with highly polished aluminium tube shrouds.

Send for illustrated literature today, describing this wonderful product.

** British Patent No. 652266. Others pending.*
