BEST OF BOTH ON STAND 87

Continental flair and British Craftsmanship—that's the Benelux, the best of both schools of thought. It offers a choice of 3, 4 or 5 speeds from five models. It is the slickest, neatest single wire derailleur yet made by Cyclo—and that means it is the king of its class. It has a new handlebar end control lever that can be adapted to ANY single wire derailleur. See it on stand No. 87 together with the complete range of gears and high-grade lightweight accessories made by Cyclo, leaders from the start.

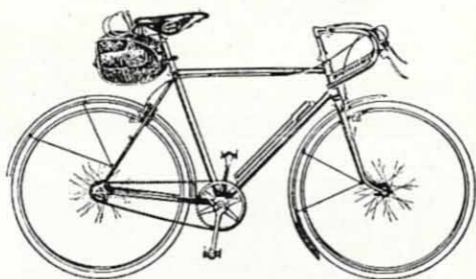

By the way, you can stage your own Cyclo Show by writing for literature describing the Cyclo range. It is yours for the asking.
