## TURBO-VISOR — A certain winner

"You really can see in the rain!" says Jim Redman, 350c.c. World Champion, who looks on the Turbo-Visor as an essential part of his equipment. His opinion is endorsed by top racing drivers, who have used it at Snetterton, Silverstone and other well-known circuits. There are more scooterists and motor-cyclists on the road today than ever before and every rider is a potential customer. The Turbo-Visor retails at 39/6d. complete for the Polypropylene Mounted model and 47/6d. complete for the Anodised Aluminium model, and at these modest prices they are a "must" in the wet weather months ahead.

**THIS CAN MEAN BIG PROFITS FOR YOU!** Stock up NOW with this revolutionary clear vision Visor, which literally "spins the rain away" . . . and watch your sales rocket! For details of terms and full particulars about the Turbo-Visor contact the sole distributors:

## C.100 BATTERY Ref. No. B.A.T.2.

This is a British-made battery for the C.100 HONDA. Multi-plate construction in transparent case. One piece filler cap. This feature is an improvement on the original equipment making topping up a simple and quicker operation. Supplied with correct leads and plastic breather tube. Dry charged feature means that the battery merely has to be filled with acid (1250) and is ready for fitting to the machine. Individually boxed in strong carton.
