

# KEEP IT SIMPLE

Sell Yamaha. Our U.5 Lightweight Scooter is a simple job. The Autolube looks after engine lubrication, the automatic clutch and gearshift are sweet in action and the two-stroke power unit lasts well. So even if your customer is a learner you are unlikely to see much of the U.5 except at long intervals. And after a couple of years, any Yamaha is an excellent trade-in.

Our Hundred Twin is another seller. It's full of zip, but it is not forever round your neck! It's what the youngsters want, although quite a few Dads like the silky power of a twin two-stroke.

Our range is simple—deliberately. Yamaha make 17 models but trying to sell them all would make life too complicated. Each of the four Yamahas we import pulls its own weight into the cash till. So if you have a good live Yamaha dealer near you please contact him. If you haven't, contact us!
