are turned over and which cannot close up because of the solder between the individual stands.

show visitors may well acquaint themselves with the reason why the word was chosen.

gearcase and tapp  
**Edmonton, London, N.18.**  
**STAND No. 38**

### *Accles & Pollock, Ltd.*

WHAT does a machine look like before it is made up? You will find the answer on Accles and Pollock's stand. Accles and Pollock make the tubes from which many of Britain's (and the world's) machines are made.

A visit to the stand will give you some idea of just what is meant by Kromo tubing in all its many shapes and sizes.

**Oldbury, Birmingham.**  
**STAND No. 40**
