### New Lightweight

BRITISH concessionaires for the well-known Cucciolo cyclemotor, Britax (London), Ltd., are introducing a complete motorized cycle incorporating this power unit. The frame is specially designed for use with the Cucciolo, and is fitted with a pressed-steel, girder front fork employing rubber bands in tension as the suspension medium. A 1½-gallon petrol tank is carried around the upper frame tube, and a large autocytle saddle is used. Tyre size is 26×1½in. The standard Cucciolo is a 48 c.c. o.h.v. power unit with integral two-speed gear having preselector control.

Retail price of the complete machine, including British purchase tax, is £61 8s 6d. Less power unit, the cycle sells for £21 8s 6d, including purchase tax. Deliveries are expected to begin at the end of this month. The address of Britax (London), Ltd., is 115-129, Carlton Vale, London, N.W.6.

*Motorized cycle incorporating the 48 c.c. overhead-valve Cucciolo power unit*
