

THE
cucciolo
(LITTLE PUP)
CYCLE AUXILIARY MOTOR

Effortless Cycling for ALL

**300
M.P.G**

**Save precious time and energy —
fit a cucciolo to your cycle.**

It is not only a NEW way of individual transport but it is also basically DIFFERENT and FASCINATING. Experience the luxury of sitting astride your own cycle and bowling merrily along without any straining on the pedals. Watch hills disappear like magic and the whole journey become carefree, enjoyable, and tireless.

**25-30
M.P.H**

With a cucciolo the daily range of travel is greatly increased and you can enjoy the independence of your own motor transport, at the absolute minimum of expense.

**48
C.C.**

The cucciolo is safe in use, simple in operation and easily understood. It is designed to ensure ease of maintenance, and its robust construction guarantees years of lasting and efficient service.

The "little pup" cucciolo is the finest cycle auxiliary motor ever produced and over 250,000 satisfied users in all parts of the world testify to its efficiency and reliability.

MOTORISED TRAVEL — 8 MILES FOR A Id.

Cucciolo

**SAFE . SIMPLE
SPEEDY . RELIABLE**

Cucciolo is a four-stroke engine: no oil has to be mixed with the fuel. Lubrication of engine is independent and fully automatic. No mixture being used, re-fuelling is simple, speedy and clean.

Cucciolo is of extremely neat appearance and of compact, advanced design. Engine being fitted at the bottom bracket, it considerably improves balance.

Cucciolo has a multiple metal plate clutch working in oil bath: starting and halting are extremely smooth. The engine can be kept running while the bicycle is at a stop.

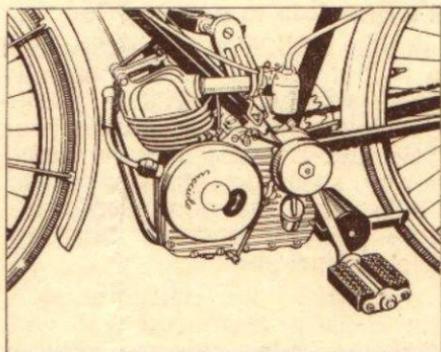

Cucciolo ensures maximum stability: its weight is evenly distributed between front and back wheel.

Cucciolo incorporates a two speed, pre-selection gear box: the ratio enables negotiation of gradients at speed without the aid of the pedals. Efficient cooling is provided by a number of slots and fins where the airflow is maximum.

Cucciolo has greater power and is cheaper to run than any two-stroke engine of the same cylinder capacity.

Cucciolo is the bicycle engine featuring:—DIRECT CHAIN DRIVE FOR POSITIVE TRACTION—No additional wear on tyres—No bending or breakage of wheel spokes—No twisting of cycle frame.

Cucciolo is simple, strong and reliable. It is the perfect answer to the most exacting requirements.
