THE MOTOR CYCLE AND CYCLE TRADER

MOTORISED BICYCLES

Orders Exceed Anticipations

THE potentialities of the motorised cycle are well exemplified by the state of affairs at the Excelsior works. "Bob" Vaughan tells us that he has more orders in hand than ever were anticipated, and the department dealing with the Excelsior Auto-Byk is working at top pressure.

A separate section has been set aside at the factory for the erection of this attractive little model. Sales are being effected in all parts of the country and overseas.

"Bob," at the time of our call, was just preparing for a trip to Scotland.
