

New Italian Mopeds GARELLI range—

Mopeds are available in 1, 2 and 3 speed models

A NEW range of Italian mo-peds is announced by Stuart & Payne, Ltd. from the well known *Garelli* factory. There are four models of similar basic design.

Three of these, known respectively as M.I, M.II and M.III have the same engine, frame and suspension layouts but are single, two and three speed models. The *Garelli* engine has a bore and stroke 40 mm. x 39 mm. giving a capacity of 49 c.c. and develop 1.7 b.h.p. at 5,500 r.p.m. The carburettor is a *Dell'Orto* with a large air cleaner/silencer.

Tubular frames with telescopic front and swinging arm rear forks are employed. The wheels have full width hub brakes and 24-inch x 1 $\frac{3}{4}$ -inch tyres. Saddles and handlebars are both adjustable for height and the headlamp mounted speedometer is standard equipment within the prices.

The fourth machine is called the *Garellino* and is a single speeder but with an automatic clutch. The engine is as on the larger machines but the primary drive is by V-belt to a counter-shaft and there are independent chain drives for the engine and pedals.

The frame also follows the lines of the M. range except that the rear end is unsprung and smaller wheels and tyres are used (22-inch x 2-inch). The speedometer is not included in the standard price of this model.

The Prices are:

Garellino	..	£57 17 11
M.I	..	£66 19 6
M.II	..	£75 12 0
M.III	..	£79 16 0

The machines are now available to dealers and the concessionaires are Stuart & Payne, Ltd. 6/7, Bankside, London S.E.1.

— *And a
revolutionary
water motor
with
safety drive*

Stuart & Payne are also handling the *Garelli* outboard motor known as the "Gary Jet-4" which has no conventional propellor but operates a rotary impellor at the foot of the shaft which forces out a powerful jet of water to propel the boat.

We have had the opportunity of a fairly prolonged test on one of these engines using two craft, a light sailing hull which used the speed capacity of the motor to the full and a heavier 12-foot utility boat with four people up. The jet system works well and provides full performance from the lively 87 c.c. engine with quite exceptional manoeuvrability at low speeds. It can of course, be used in weed or mud and up against banks where an ordinary propellor cannot operate, but the really big appeal is in its safety as no damage can be done to swimmers or surf boarders even if they come into direct contact with the drive.
