

A Little Honda Lets You Enjoy Life More

Very Safe, Simple To Control

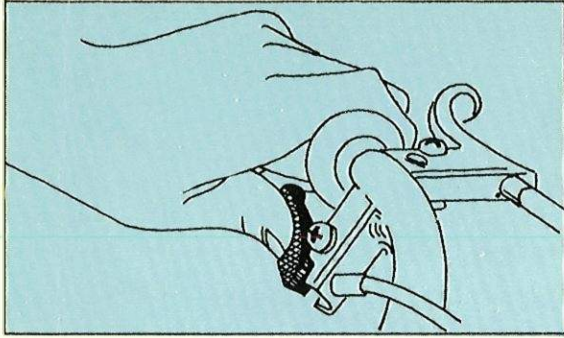

Specifications of Model P-50

This is the world's most economical motor vehicle. The initial cost is quite inexpensive, repairs and maintenance are almost unnecessary and the Little Honda runs an amazing 225 km on one tank of gasoline (2.5 liters, or 0.6 imperial gallons). Since it is powered by a reliable Honda OHC 4-stroke engine, there is no messy exhaust smoke or engine oil leaks. Quiet as -- a whisper, too.

The Little Honda makes life more enjoyable. Perfect, most economical for daily transportation a quick trip to the store, commuting to school or office, running around town, etc.

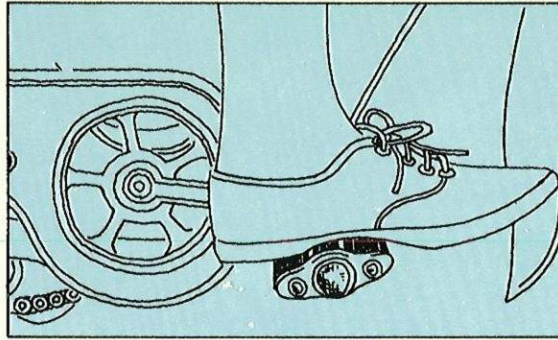

With an automatic clutch, it is so simple and safe anyone who can ride a bicycle can ride a Little Honda. The engine is easy to start. Just push a lever, pedal the bike and release the lever. Speed is held down to a realistic and safe level.

Quite Simple To Start

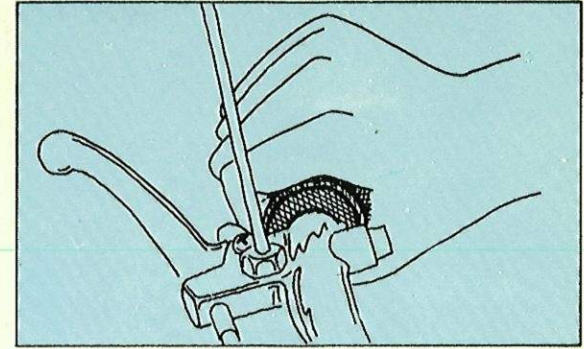

One

Push in the small lever on the left handlebar with the left thumb and hold it.

Two

Turn the pedals with the feet until the bike is moving forward at a walking pace.

Three

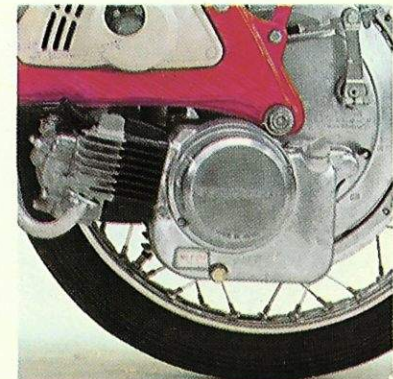

Release the small lever on the left handlebar and slightly open the throttle grip on the right handlebar. The engine will start easily.

The Little Honda is quite simple to control, as it does not require the use of a clutch or gear changing. Speed is controlled by the foolproof throttle grip. Quick, safe stops by pulling in the brake levers on each handlebar.

This bike is powered by Honda's unique overhead camshaft 4-stroke engine. This is a most dependable, troublefree engine without oil leaks or messy exhaust smoke. An efficient muffler and silent engine keep the Little Honda quiet.

Simply flip the lever in back of the engine to "off" and the engine is disconnected so the Little Honda can be used as a bicycle.
