

**PICTURE  
of the  
WEEK**

*THE time-honoured sport of push-biking round perimeter tracks is on the way out. Nowadays, the R.A.F. is saving time and manpower by issuing 98 c.c. James "Comets" to N.C.O.s in charge of crews servicing widely dispersed aircraft. Already large numbers of these 150-m.p.g. two-strokes are in use. In this picture—among the first released—one of them poses under the tail of a paraffin-drinking Valiant bomber.*
