

There's an enthusiasm for recording mileage

— and Lucas Cyclometers keep that enthusiasm alive by recording every mile cycled, whether it is only a short local run or a whole seasons cycling. Precision built with watch-like accuracy they record (in tenths) up to 10,000 miles and then repeat. Dust and waterproof, supplied complete with hub spindle bracket and striker. **Price 7/6**

Available for wheels of 24, 26, 27 and 28 inch diameter. Just released for cycles with front-wheel "Dyno-hubs", the new DH26 model in the green box, has a special striker which replaces one of the hub through bolts.
