The MAGNEET B50 MOPED!

MAGNEET

"Sensational, Epoch-making Construction." "Revolutionary Development." Small wonder! This moped at once strikes the eye by its dramatic lines. It's a moped-without-a-frame, having a self-contained body. Indeed, the Magneet B50 is making history — it's far in advance of its time — both in looks and comfort plus safety for the user.

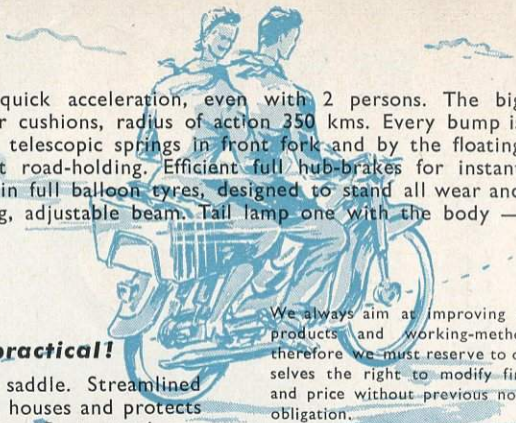

The MAGNEET B 50 is safer!

The strong and reliable Sachs 2-speed motor, quick acceleration, even with 2 persons. The big 1,5 Gallon tank is fitted vibration-proof in rubber cushions, radius of action 350 kms. Every bump is intercepted by the hydraulic rear springs and the telescopic springs in front fork and by the floating saddle. Low lines (scooter shape) ensure excellent road-holding. Efficient full hub-brakes for instant action in sudden danger. The tyres? 23" Vredestein full balloon tyres, designed to stand all wear and tear. First rate visibility in dark by means of strong, adjustable beam. Tail lamp one with the body — invulnerable and sleek!

The MAGNEET B 50 is more practical!

Tool-space hidden under the tip-up saddle. Streamlined front of telescopic fork and headlamp houses and protects all cables: cannot catch, easy to clean. Coat guard one with the mud guard: rattleproof. Robust stand for rock-steady stability in parking, storing. The deep, widely diverging front- and rear-mudguard will absolutely throw back all dirt. Complete protection for the driver. Luggage carrier (with handy grip) immovably attached to body — lots of space for luggage, comfortable seat for pillion passenger.

We always aim at improving our products and working-methods, therefore we must reserve to ourselves the right to modify finish and price without previous notice obligation.
