MOTOBECANE

Motobecane Mopeds have been sold and serviced in the United Kingdom for well over a quarter of a century, no other moped has this distinction. Motobecane (or Mobyette) as it is more commonly known have proven so reliable and virtually indestructible that few radical changes have had to be made.

But the 80's are here and with ever rising fuel costs, putting an emphasis on even more economical forms of transport a brand new breed of Mobyette has been designed, and like a breath of fresh air across a parched desert come the *NEW* and *EXCITING* 7s and 51s.

Firstly the 7TL and the 7SP have restyled frames and sixteen inch wheels giving them a lower profile, thus making them the ideal "step thru" moped for the female rider. Both models have the same 'Floating' engine to remove most vibrations, and the Dimoby automatic clutch and single twist grip control makes them comfortable and easy to ride. The 7SP also has rear suspension for even greater comfort, all this coupled with up to a miserly 180mpg makes the 7TL or 7SP the ideal commuter transport of the 80's and very easy on the pocket.

Moving on up the range we have the 51VSB, 51SU and the 51VLCB, all have the fantastic *NEW AV10* engine, a cutaway picture and description are both on this page. This amazing little engine has ample power even at very low revs and maintains it right through the power band. This coupled with the Mobyatic gearing makes easy going of most hills even with a heavy rider. Of course if technical details tend to leave you cold then look at the stylish lines, the 51's have been rejuvenated, more acute angle on the rear suspension giving greater road holding, cast aluminium alloy wheels fitted as standard to the 51SU and 51VLCB and the latter also has flashing indicators. Surely these must be the mopeds of the 80's.

If your still not convinced then ask your dealer for a demonstration ride — TODAY . . .

ACCESSORIES:

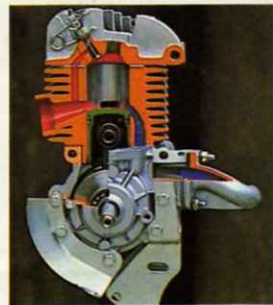

A full range of accessories are available such as Carriers, Panniers, Mirrors, Top Boxes, Legshields, Windscreens, Flashing Indicator Kits See price list for details.

REMEMBER ALWAYS ASK FOR GENUINE RECOMMENDED ACCESSORIES.

ALL MOPEDS ON THIS LEAFLET MEET THE U.K. MOPED LEGISLATION AND MAY BE DRIVEN ON A NORMAL CAR LICENCE.

The advantages of the *NEW AV10* Engine illustrated below:

This new lightweight and compact engine is fitted to all of the 51 models, designed with induction direct into the crankcase through a reed type valve allows a third transfer port to be incorporated in the cylinder. The cylinder is made of a light but durable chromed alloy with three transfer ports to allow a better and more efficient passage of fresh gasses to the combustion chamber. This improvement gives exceptional acceleration and stamina, even at low revs. there is plenty of power and this is maintained throughout the power band.

CUTAWAY OF AV10 ENGINE

SPECIFICATIONS:

ENGINE: AV10 FOR ALL THREE 51 Models

Capacity: 49.9cc. Air Cooled Two Stroke.
Compression Ratio: 8—1.
Carburettor: Gurtner 12mm.
Ignition: Novi Magneto 25w
B.H.P.: 2.2 @ 5500 RPM.
Clutch: Dimoby Automatic.
Gears: Infinitely Variable Automatic.
Primary Drive: Self Adjusting Vee Belt.
Final Drive: $\frac{1}{2}$ " x $\frac{3}{16}$ " Chain.
Simple lever operation to convert from power to pedal drive.

FRAME: 51VSB (not illustrated)

Pressed Steel Welded.

Dual Seat.

Telescopic Front Forks.

Swinging Rear Arm Suspension with Shock Absorbers.

Internal Expanding Brakes Front and Rear.

Heavy Gauge Spoked Wheels with Chrome Rims.

Tyres 2.25 x 17 Front and Rear.

Overall Length: 70".

Dry Weight: 110lbs.

Colour: Azural Blue.

FRAME: 51VLCB (illustrated)

Pressed Steel Welded.

Dual Seat.

Telescopic Front Forks.

Swinging Rear Arm Suspension with Shock Absorbers.

Internal Expanding Brakes Front and Rear.

Light Aluminium Alloy Wheels.

Tyres 2.25 x 17 Front and Rear.

Flashing Indicators.

Overall Length: 70".

Dry Weight: 114lbs.

Colour: Garnet Red.

FRAME: 51SU (illustrated)

Pressed Steel Welded.

Single Anatomic Designed Saddle.

Chromed Rear Carrier.

Telescopic Front Forks.

Swinging Rear Arm Suspension with Shock Absorbers.

Internal Expanding Brakes Front and Rear.

Light Aluminium Alloy Wheels.

Tyres 2.25 x 17 Front; 2.75 x 17 Rear.

Overall Length: 70".

Dry Weight: 110lbs.

Colour: Black with Gold Trim.

All Models Equipped with: Speedometer, Electric Horn, Steering Lock and Helmet Latch as standard equipment.
