

EXCITING MOPED NEWS

NOW THE STREAMLINED NEW

NSU Quickly S/2 23!

Now the Quickly S/2—one of the most popular mopeds ever produced—takes on a new, streamlined modern look. And you'll like the new look of the Quickly S/2 23. New, sleek, functional lines—and one very welcome alteration: the 1½ gallon fuel tank. This new tank is carefully shaped to give you a firm knee-grip. NSU, makers of some of the finest mopeds the world has seen, know how much better control of your machine—and greater safety—this gives to you. But the greatest news is this: the new S/2 23 costs even less than the old machine! Send up the coupon now for full details.

NEW FEATURES • Compact new styling • 23" Wheels • Alloy rims • Heavier tyres (2½" on rear wheel) 1½ gallon knee-grip fuel tank • Streamlined head-lamp and speedometer housing • Cables now fixed externally • Pump and tool-box located under hinged dual seat • New colour scheme of pearl grey and airline blue.

PROVEN FEATURES • Rugged Quickly welded steel frame • Powerful (2 b.h.p.) S/2 engine and 3-speed gearbox • 5" diameter hub-brakes with 6.5 sq. in. braking area in each hub • Luxurious Denfeld dual seat • Quickly 12 Months Guarantee backed by nation-wide network of NSU Dealers who offer first-class spares and after-sales service.

NEW N.S.U. "QUICKLY" S.2

The new features of the S/2 are compact styling; 23" wheels (smaller than earlier models); alloy rims; heavier tyres (2½" on rear wheels); 1½ gallon knee-grip fuel tank (enlarged); streamlined headlamp and speedometer housing; pump and

tool-box located under hinged dual seat; new colour scheme of pearl grey and airline blue.

Most important of all, the new machine costs *less* than the machine it replaces. With all these improvements the retail price is £89.16.6. The *Quickly N* and *Quickly S* continue unchanged.

Smaller wheels give more compactness and greater stability to the machine. The fuel tank, with racing-style indentations acting as knee rests, has been reshaped and positioned to give maximum riding comfort, and its capacity has been increased to 1½ gallons (sufficient for 150-200 miles with two up).

The frame is pressed as a complete steel unit with strengthened spine, while leading link front suspension and small wheel diameters combine to ensure a safe and comfortable ride.

A three-speed gearbox enables the rider to select the right speed for any condition without relying solely on brakes.

The dual-seats are the last word (very nearly, at any rate) in two-wheel comfort.

The S/2 can carry two people with power to spare. Its more potent engine, with 3-speed gearbox, has a compression ratio raised to 6.8 to give approximately 2 b.h.p.
