Season**SELLWELL PEDALS**

for Popular Machines.

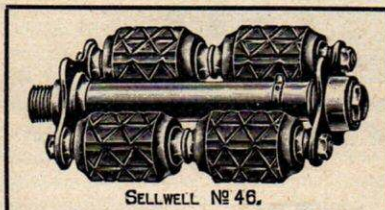

SELLWELL No. 48.

Fitted with Cross Stays under B.S.A. License.

SELLWELL No. 44.

SELLWELL No. 46.

SELLWELL PEDALS.

Guaranteed for two years.
Hand-polished and plated (not barrelled).

No. 48, Rat-Trap	1/9 per pair.
" 44, Gent's ord. Rubber	2/2 "
" 45, Lady's "	2/2 "
" 46, Gent's divided Rubber	2/3 "
" 47, Lady's "	2/3 "

VOX POPULI PEDALS.

Guaranteed for two years.
Highly hand-polished and exquisitely plated.

No. 4, Rat-Trap	2/4 per pair.
" 5, Gent's ord. Rubber	2/8 "
" 6, Lady's "	2/8 "
" 10, Gent's divided Rubber	2/10 "
" 9, Lady's "	2/10 "

Extra Strong Motor Pedals, Vox Populi, No. 40, 4/- per pair.

PEDAL CONSTRUCTION.

There is no part of a cycle which has to stand more wear than the Pedal. Phillips' Pedals are made on sound mechanical principles, with ball races carefully machined from suitable bar steel.

Phillips & Co. have the largest and most up-to-date Automatic Plant for Pedal making in the United Kingdom. Their Pedals are wonderful value for money.

Pedals sold by other firms at similar or even higher figures have ball race cups made from pressed sheet metal, which in the process of raising and recessing, is left exceedingly weak, and which experience has proved to be most unsatisfactory. Some so-called "**Solid Centre**" Pedals are merely thin pieces of tubing bulged out at the end, with loosely concealed pressed sheet metal cups let in.

No other Pedals can compare with Phillips' Pedals for wear and sterling value.

1907 Preliminary List
and Artistic Showcard
sent Post Free on appli-
cation.

The above prices are subject to a discount of 5 per cent. for prompt cash. Goods train consignments packing cases.

LEVER
R2N2 473541.VOX POPULI
ROLLER
BRAKES

Roller Brakes have proved a great success.

Of the many improvements in our 1907 pattern Roller Brakes our **Patent Lever Clip** is the most important, inasmuch as it is free of the defects of those made of pressed sheet metal, which are liable to become loose on the bar, or unable to withstand the strain of the lever in its revolving motion.

Our Patent Lever Clip is an exceedingly neat article which will help to sell any machine to which it has been fitted.

It is properly machined and **unbreakable** when fastened to the bar.

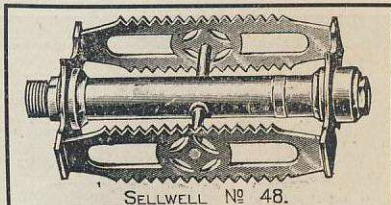

There are no ugly tightening bolts and nuts to be seen. No Rattle. No Backlash.

Plated Handlebar ($\frac{7}{8}$ x $\frac{7}{8}$ in.) complete with Dover Handles and fitted with front and rear Brakes complete, 9/9 per set. Front Brake complete, 6/3. North Road Handlebars 3d. each extra.

After Many Years and Still Efficient.

Kennington Road, 14/10/06.

To the Bowden Brake Co.

Dear Sirs,

Re the present controversy about brakes, it may interest you to know that I have a Bowden Brake on my machine which was purchased one month after they were put on the market. It is still in use, and in good condition, and the original cable is still with it, and the brake has saved me a large number of accidents.

I have no hesitation in recommending this brake for real efficiency.

Yours truly,

C.N.
