This is the JOYBIKE

A SIMPLE EASY TO SERVICE
MOPED MADE BY A BIRMINGHAM
RETAILER FOR HIS OWN SALES

It is proposed to tool up for larger production to sell to other retailers. To gauge the interest dealers are asked to send a billhead for a leaflet giving full details of this machine which is powered by the 49cc. or 75cc. Trojan industrial engine, a unit that has been on the market for ten years. Those retailers who are able are invited to call and try the Joybike. Two models will be made, prices approx. £45 and £55.

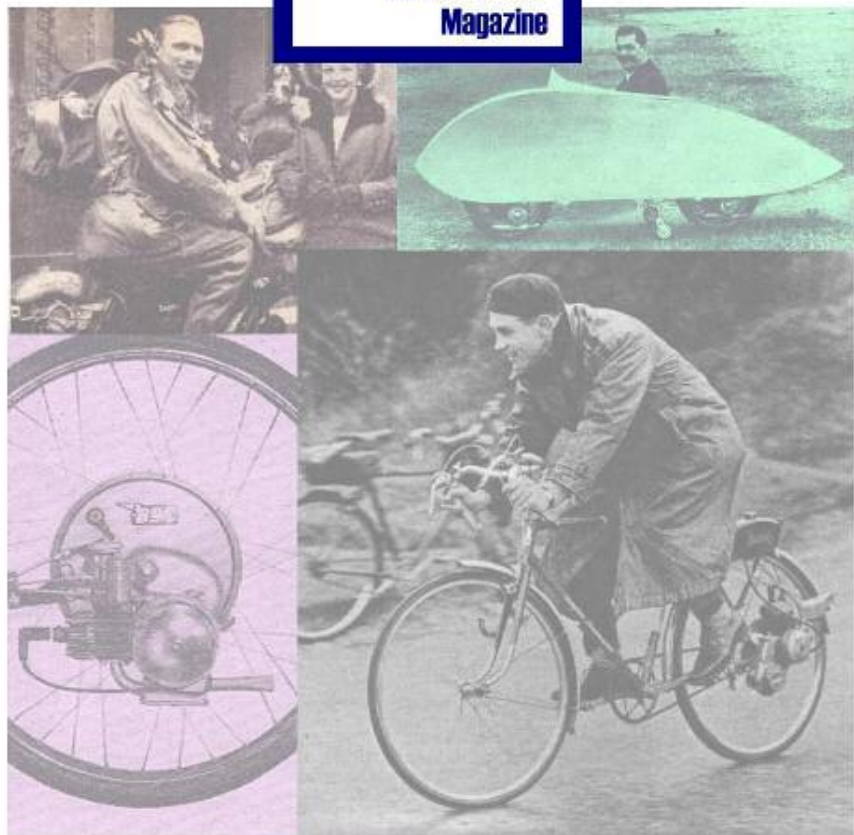

The photograph of the engine gives details of the drive which is 'patent applied for'. The gear is lowered by pulling the cable which opens the expanding engine pulley. A road test of this machine appeared in *Cycling and Mopeds* dated July 9th.
