

JOYBIKE MOPEDS

Only £48 . 15 . 0
with choice of
49cc or 75cc
Trojan Engine

LET'S FACE IT. 49cc ISN'T ENOUGH

49cc Mopeds perform reasonably well, but bore the cylinder out a mere three millimetres, increasing the capacity to 75cc, and you have a machine which, with a single gear, will accelerate rapidly up to 35mph. and climb hills up to 1 in 7 without pedal assistance. The bulk of running is on quarter throttle only.

The 49cc Moped engine size has been imposed on the country because machines up to this capacity are tax free on the continent, here where all machines have to be taxed and insured, it is absurd to handicap ourselves with such a small engine.

The Trojan 75cc engine weighs 11 lbs. and produces enough power to make a gear box unnecessary. It has only three moving parts as against 20 to 30 in an engine gear box unit.

Joybike agencies with exclusive territories are available. Write us:
