TRIUMPH'S RETURN TO OLD HOME

Manufacture of Triumph and Three Spires cycles is shortly to be transferred from the present factory in the Earlsdon district of Coventry to the old Triumph works in Priory-street, in the centre of the city. When the Triumph car, motor cycle and cycle interests separated, the old factory was shut down. It has been up for sale ever since, and at last has been taken over.

The TriVelox gear side is already in occupation of the other section of the works.
