

THE MOPED WITH THE SMOOTHEST RIDE!

There's no "rock and roll" with the Vesting "Pesetta", the Mo-ped that's really made for two. The secret of its smooth travel over the roughest going and of its sure road-holding ability lies in its independently operating pillion suspension and the rear wheel swinging arm suspension. This feature is found only on the Vesting "Pesetta". In addition there is the lively 49.9 H.M.W. engine (developing 2.2 b.h.p.) which carries rider and passenger without flagging. Another interesting point is the pedal release control which overcomes

all mechanical drag and enables the machine to be pedalled like an ordinary cycle, if desired.

Write for details of dealerships to the sole concessionaires in U.K. for Vesting "Pesetta" and distributors of H.M.W. engine spares:
STUART AND PAYNE LTD.,
4, Broad Street Place, London,
