CHAIN WHEELS

EDWARD WILLIAMS, LTD. No. 104

At the show, hundreds of our readers will be ordering new machines. When it comes to the choice of chainwheels, there may be some hesitation as to what type to choose, although, of course, in nine cases out of ten they will be of Williams' manufacture. A visit to the stand of this famous firm of chain-wheel specialists will at once repay the visitor, for all types of transmission will be on view. The famous Dureel chainwheel and crank set made up of specially light duralumin material, weigh only 1 lb. 4 oz., and yet are as strong as the all-steel sets.
